

# Bachelor of Chiropractic Science

Chiropractors have the privilege of being able to positively impact people's lives through the provision of natural and non-invasive healthcare methods. They have a deep understanding of the body's structures and how each interacts to affect our health. Using spinal adjustments, manipulation and other physical means to improve neuromusculoskeletal function, chiropractors can help us live healthy and active lives.

## OVERVIEW

This degree – the longest-running of its kind in Australia – will prepare you for a rewarding career in one of the largest primary health professions. When you combine it with the Master of Chiropractic, you'll be equipped to work in private practice, chiropractic sports medicine, allied health areas, health insurance assessment, medico-legal advising, work health and safety, rehabilitation and research.

## KEY FEATURES

- You'll acquire a strong scientific foundation, leading to the development of a comprehensive knowledge and understanding of the structure and function of the human body, the dynamics of biological change and variability, and the exploration of human interaction in states of both health and disease.
- This degree offers training in a wide range of diagnostic and chiropractic manipulative skills in the context of anatomical, physiological and biomedical sciences.
- You'll have access to our world-class anatomy labs, which will provide you with the essential hands-on experience you need before entering the workforce.
